Save time. Save money. Save lives.

The Exiway DiCube System from Schneider Electric is the intelligent way to keep building occupants safe during critical situations.

Only Exiway DiCube provides simple and intuitive local and remote access to emergency lighting devices and their data, while also allowing automatic testing and integrated monitoring.

The system has the scalability and flexibility to meet the needs of any building design installation – small, medium, and large commercial buildings, including offices, banks, hotels, restaurants, and hospitals. And Exiway DiCube allows easy and virtually unlimited expansion, with no changes to your existing Exiway DiCube emergency lighting system.

Enjoy the peace of mind...

that comes with simplified installation and operations, guaranteed regulatory compliance, and safe, satisfied customers.

Simple

- Easy to install, commission, and maintain
- Low cost of ownership

Connected

- Advanced connectivity via IP port, integrated Webserver, Android app, and software tools management
- Local and remote management via PC Suite software

Advanced

- PC-based software for advanced maintenance
- Laser pointer activation for simplified luminaire addressing and testing
- VLDP (Visual Light Data Pulling) to access luminaire data

Long-lasting

- LED-based for lower power consumption and longer life cycle
- State-of-the-art battery technology for longer lifetime and reduced maintenance costs

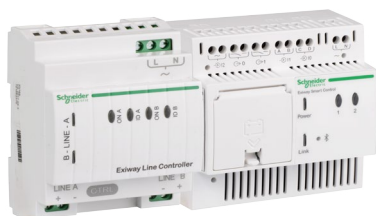

The intelligent approach to building safety.

Exiway Smart Control

- Automatically runs functional and duration tests on all connected devices
- Scalable design and innovative components accommodate all installations, small to large
- With Exiway PC Suite, enables management, configuration, and control of devices throughout the building, locally or remotely
- With Exiway Suite (Android app), permits monitoring of all connected devices via free smartphone mobile app
- Integrates with the building management system (BMS)
- Easily expands the number of devices controlled with additional Exiway Line Controllers

Control Unit and Line Controller

Exiway PC Suite software

Using Exiway DiCube Smart Control can be as easy as pushing a button

Reduced planning, installation, and maintenance costs.

Exiway Smartled

- Advanced LED technology saves time and money – eliminates re-lamping, reduces energy consumption, and provides up to 100,000 hours of service
- Advanced battery technology – LiFePO4 – for longer luminaire lifetime
- Ready to install, with no tools required – all connections are self-tightening
- Smartled antipanic with one compact dimension covers all market requests from 200 to 800 lumen
- Exiway Visual Light Data Pulling (VLDP) allows all data stored on individual luminaires to be read by an optical reader and displayed directly on a mobile device
 - » Displays address, production date, battery type, and other important data
- Exclusive laser pointer receiver on each luminaire allows simplified commissioning and functional testing – no ladder required
- Devices can be sequentially numbered to optimize and ease maintenance

Combining simplicity, functionality, and aesthetics.

Exiway Smartexit

- Clean sign design; interchangeable pictograms are included with the luminaires
- Pictograms are compliant with ISO7010 and UNI EN 1838 standards
- Innovative solution for multiple installation options: one product adapts to wall, ceiling, or flag mounting styles
- No tools or accessories required
- Visibility distance of 26 and 32 metres ensures optimum sign visibility, both in medium-sized rooms and in larger areas
