> Measurement

MicroLogic X performs the measurement of all electrical parameters of an electrical network: Currents, voltages, frequency, power, energy & power factor. Min/Max and average values are elaborated for most of the parameters. Optional digital modules allows the measure of energy per phase and wave form capture.

> Diagnostic

The diagnostics allows to limit the risk of power interruptions and to re-energize the installation as quick as possible after a trip. They provide warnings and messages to help the user in scheduling both preventive and predictive maintenance and device replacement as well.

Note: For further details on measurement and diagnostic, see Chapter B of MasterPacT MTZ catalogue.

Dimensions and mounting

B

> For more informations,
please refer to chapter D "Dimensions".

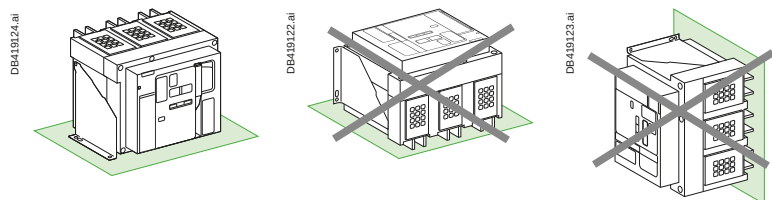

[1] the MasterPac MTZ1 is 13 mm deeper than MasterPac NT due to its charging handle redesign. For MasterPac MTZ2/3 the difference is only 3 mm.

Fixed version

Two identical frame sizes using the same mounting system as the MasterPac NT/NW range , new front cover and charging handle design.

Replacement/extension in an existing switchboard:

- MasterPac NT/NW replaced by a MasterPac MTZ identical in size
- same fixation points
- same power terminals, same position
- same type of secondary connectors, with some difference in their order
- slight depth difference at the front face level, due to the front cover and charging handle redesign.

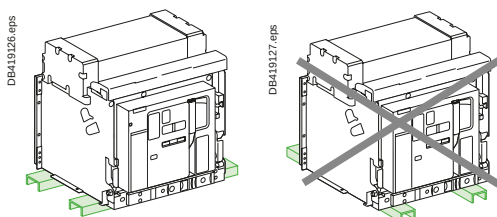

Drawout version

Two identical frame sizes using the same mounting system as the MasterPac NT/NW range.

Replacement/extension in an existing switchboard:

- MasterPac NT/NW replaced by a MasterPac MTZ identical in size
- same fixation points
- same power terminals, same position
- same type of secondary connectors, with some difference in their order
- slight depth difference at the front face level, due to the front cover and charging handle redesign.

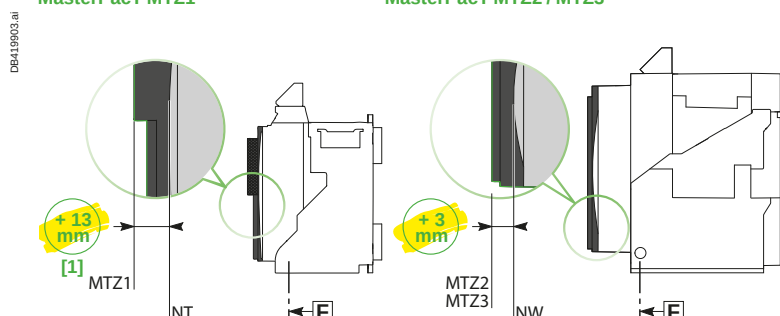

Fixed and drawout version

The MasterPac MTZ1 is 13 mm deeper than MasterPac NT due to its charging handle redesign, for a better ergonomics. For MasterPac MTZ2/3 the difference is only 3 mm.

Integration of MasterPac MTZ in Prisma, Blokset or Okken cubicles does not require design or parts modifications.

Compatibility

Circuit breaker MTZ in chassis NT/NW

Compatibility from MasterPacT NT/NW to MasterPacT MTZ

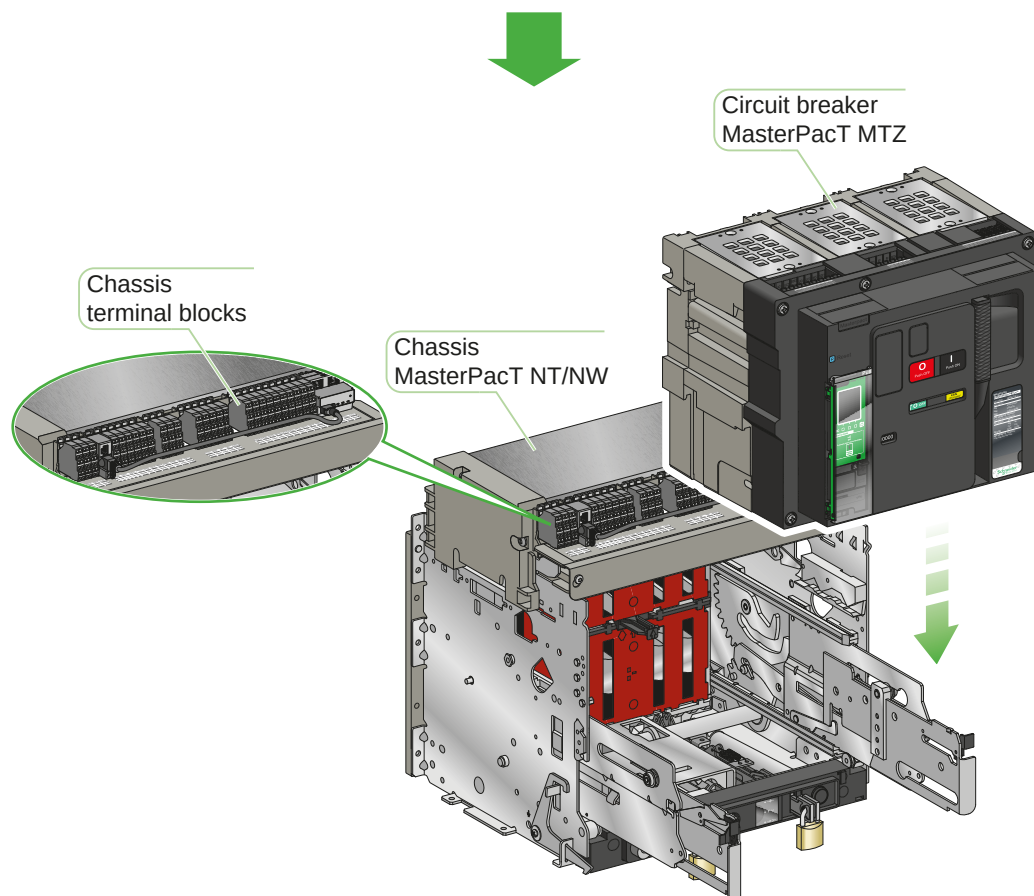

- A MasterPacT NT or NW chassis can be adapted for receiving a MasterPacT MTZ device.
- The procedure is described in the following instruction sheets:

- QGH31933 for MasterPacT NT
- QGH31931 for MasterPacT NW

The following additional parts need to be used:

- 1) for MasterPacT NT: retrofit kit to MTZ1 chassis LV850066SP
 - 2) for MasterPacT NW: retrofit kit to MTZ2 or MTZ3 chassis LV850065SP
 - 3) for NW 08-12 N1, NA and NW 08-16 H2, H2A, HF: clusters LV864906SP as indicated in QGH31931.
- MasterPacT MTZ chassis can not be used with MasterPacT NT/NW.

B

Specific attention of the MasterPacT NT/NW chassis condition is required prior to proceed with breaker replacement.

Schneider Electric specialists are available to assess the safe working condition of the chassis with its replacement breaker.

ECOFIT™ MasterPacT M to MasterPacT MTZ upgrade solutions

Circuit breaker

> MasterPacT ECOFIT MTZ
Circuit breaker

Schneider Electric has developed tested solution to upgrade obsolete MasterPacT M with MasterPacT MTZ

MasterPacT M ECOFIT™ solution

Plug & Play

A fast and simple upgrade solution.

The ECOFIT™ MasterPacT Plug & Play solution lets you retrofit the latest generation of MasterPacT MTZ circuit breakers in the existing MasterPacT M chassis.

Note: Solution available for withdrawable type only, 3P and 4P, 800 to 3200 A.

Masterkit

The ECOFIT™ Masterkit solution enables to benefit from all the enhanced features of MasterPacT MTZ circuit breakers and accessories without modifying the busbars. It requires total shutdown of the installation to access the busbars

Note: Solution available for fixed and drawout types, 3P and 4P, 800 to 6300 A.

[1] Need to disconnect the shield at ENCT level. [2] MasterPacT NT and MasterPacT MTZ1 chassis are interchangeable but the CE, CD and CT are not at the same place, the wiring of the MicroLogic is not the same and UC3 and SDE2/RES terminal blocks positions are switched between. Use the Retrofit kit for NT chassis to MTZ1 - LV850066SP - for making compatible a NT chassis with a MTZ1 device.

^[1] For switch disconnecter without communication capability only.

^[2] MicroLogic wiring is not the same. UC3, M2C and SDE2/RES terminal blocks positions are switched between. NW chassis doesn't allow the mounting of the EIFE option. Use the Retrofit kit for NW chassis - LV850065SP - for making compatible a NW chassis with a MTZ2 or a MTZ3 device.

...SUSTAINABILITY READY

Contribute to a better world — with MasterPacT MTZ circuit breakers you can enhance sustainability.

Build superior sustainable and efficient properties by reducing CO₂ emissions, utility and operating costs as well as improving the well-being of property occupants for both new construction and renovation projects.

Achieve Green Building certification with MasterPacT MTZ:

In compliance with ISO 14025 PEP Ecopassport program, Schneider Electric publishes a comprehensive Life Cycle Analysis of our product, providing the environmental data you need to achieve Green Building certifications.

For example, MasterPacT MTZ contributes to 4 LEED™ points:

- Building Product Disclosure and Optimization
- Advanced Energy Metering

Circular
performance

Resource
performance

Well-being
performance

With the addition of digital modules, the circuit breaker can be upgraded and modernized at any time after installation without disrupting electrical service.

Better durability with improved mechanical and electrical performance along with remote monitoring to help facilitate predictive maintenance.

The embedded class 1 metering allows active power and energy to be monitored, helping facility managers reduce their CO₂ emissions and energy costs when connected to any building and energy management system.

MasterPacT MTZ is fully RoHS and REACH compliant.
