Surface mounting enclosures

Mini Pragma

The easy-to-install electrical enclosure

Innovative design

Mini Pragma fits in harmoniously with all types of environment: luxury homes, shops, office buildings, hotels, etc.

Ease and speed of installation

Four oblong holes allow solid wall mounting and easy straightening. Mini Pragma also has a broad cabling surface.

Ease of connection

Several connection and cable routing possibilities are available: tubes or raceways, through the top, bottom or back of the enclosure (removable entry flange).

> Possibility of adding indication lighting

In the event of a general power outage, the enclosure remains lit for 15 min. It is thus easily identifiable and accessible to restore installation operation. The indication lighting, powered by a supercapacitor, is recharged permanently. It requires neither a battery nor a power storage battery.

> 100% secure access

The lock prevents opening of the enclosure by anyone unauthorized or uninitiated. No risk for children. In complete darkness (main power supply failure), the enclosure remains easily accessible due to the indication lighting.

> Intelligence and strength

To offer greater flexibility, several removable components are incorporated in Mini Pragma: front panel, entry flanges. The reversible door of the enclosure opens to 140° and can be dismantled beyond that, without breaking.

An environmentally friendly electrical enclosure

- Back of the enclosure manufactured from recycled polystyrene.

Presentation

Mini Pragma

Surface mounting enclosures

Mini Pragma is a robust modular enclosure (IK07), aesthetic with innovative design; it highly suitable for a living environment integration. It offers great security (IP40, IP41, with accessory) thanks to the front face with a white opaque or transparent door models on all models.

The surface mounting enclosures

The range consists of enclosures with a width of 4, 6, 8, 12, 18, 24 or 36- module of 18 mm, of 1, 2 or 3-row ready-to-use; designed for electricians: ergonomic design and flexibility of installation.

Easy installation and large cabling space

The chassis shapes are rounded and are not wounding for the cable and finger.

PB104677-90

Entry by cable, tube or trunking

Insulating edge

DIN rails

- 1 to 3 DIN rails fixed asymmetrically

Large space for cabling

Fixation

- The back fitting with 4 oblong holes is sturdy and allows vertical adjustment

Removable cable entry plates

- Located at the top and bottom of the enclosure, they offer wide access and allow easy association

Earth terminal block

- Clipped with screw or quick connection

DB430300

Removable front face

- With insulating screen

A white opaque or translucent or smoked transparent door

- Reversible opens to 140°, after which it can be removed, without breaking

Options

- Marker light: ensures that the electrical functions can be accessed in the event of a general power supply failure
- Earth, neutral and phase terminal block
- Kit IP41
- Keylock

Blanking plates

Entry by cable, tube or trunking

PB104632-90

Functions and technical data

Mini Pragma

Surface mounting enclosures

Offer: with earth terminal block

A range of 18 mm, 1, 2 or 3-row 4, 6, 8, 12, 18, 24 or 36-module ready-to-use enclosures designed for electricians: ergonomic design and flexibility of installation.

Function

This distribution or sub-distribution enclosure, up to 63 A, is designed for installing electrical switchboards in new or renovated installations in the housing sector.

Description

The surface mounting Mini Pragma consists of:

- a back with:
 - a centered slot to facilitate installation
 - fixing holes for vertical adjustment.
- the necessitate for entry cables:
 - two removable cable entry plates at the top and bottom
 - punch-outs
 - a large area for drilling (crown saw, punches)
- 1 to 3 DIN rails fixed asymmetrically onto the back
- a reversible front face, fitted with pre-cutout blanking plates
- a white opaque or translucent door or smoked transparent
- an earth terminal block.

This enclosure can be equipped with a marker light, available in accessories. It allows locating the enclosure in the dark during a power failure.

Description

Two choices are possible:

Offer to compose

This offer can compose the enclosures according to their own preference, based on a choice of 5 colours of different front face and a large number of accessories.

OR

Offer composed

This offer allows having for a single reference a complete enclosure equipped with:

- a symmetrical back box
- robust
- depth adapted to the walls of reduced thickness
- with pre-holes for entry tubes on the 4 sides
- 1 to 3 rails DIN, chassis allows the cabling outside the back box
- a rigid and reversible white (RAL 9003) front face, fitted with pre-cutout blanking plates with white opaque or translucent door or smoked transparent door
- an earth terminal block.

This enclosure can be equipped with a marker light, available in accessories. It allows locating the enclosure in the dark during a power failure.

	Supplied with the 18 or 24-module enclosure
	2 x (2 x 16 [□] + 8 x 10 [□] + 6 x 6 [□])
	Supplied with the 36-module enclosure
	2 x (2 x 16 [□] + 9 x 10 [□] + 9 x 6 [□])
Blanking plates (packs of 10)	Clipped on the front face

Presentation

Mini Pragma

Flush mounting enclosures

Offer: Universal

Mini Pragma is a robust modular enclosure (IK07), aesthetic with innovative design; it is highly suitable for a living environment integration. It offers great security (IP40, IP41, with accessory) thanks to the front face with a white opaque door models on all models.

The flush mounting enclosures

The range consists of enclosures with a width of 12 modules of 2 or 3 rows.

Function

This distribution or sub-distribution enclosure is made for flush-mounted in masonry or in gypsum partition. It is intended for new or renovated installation in residential. The universal version is the best solution for all the non electrical distribution application like multimedia central or alarm; thanks to DIN Rail (in 3 row version) and the universal grid, all components are compatible. Smart accessories let you move around the components the way you like, creating a structure in perfect order and tailor-made for your customer's needs. The consistency in design with distribution enclosure range allow best installation in term of aesthetic and technology. Mini Pragma Universal can be installed side by side to an electrical distribution enclosure and guarantee a good final design.

Surface and flush mounting enclosures

Pragma

Perfect harmony between simplicity, robustness and styling

Ease of installation

Generous cabling surface on the side and between rails, individual panels adapted to multi-position rails, removable frame, adaptable quick-connect terminal blocks,... enclosure installation has never been so simple. Enclosure combinations can be made horizontally and vertically.

Robustness of components

Pragma enclosures have been designed to last. Components in specific Schneider Electric Technoplastic for the entire range, metal parts for the 24 modules, double-hinged door,... ensuring maximum solidity for a long time.

Top-of-the-range styling and finishing

For successful integration in housing and the small service sector, the crystal door of the enclosure offers a choice of multiple finishes: Opaque or transparent glass pane, titanium white or metal grey frame. It can also be customized to suit the end customer: company logo, artistic illustration, etc.

> Productivity

Fast, high-quality installation.

> Flexibility

Pragma enclosures are suitable for all Acti 9 protection switchgear and controlgear, NG125 and NG160 circuit breakers, and contactors, terminal blocks, buttons and the Schneider Electric ultra-terminal offer.

> Peace of mind

An extremely robust and durable enclosure range.

> Simplicity

An offer that is accessible, easy to choose according to your needs.

Presentation

Pragma

Surface mounting enclosures

Pragma is the first modular enclosure combining ergonomics, attractive design and robustness at top level. This new enclosure, available in surface- and flush-mounted versions, has class II total insulation.

The surface mounting enclosures

The range consists of enclosures with a width of 13, 18 or 24 modules of 1 to 6 rows and interfaces of 1 to 3 rows. The entire range can be associated horizontally or vertically.

Easy installation and large cabling space.

The chassis shapes are rounded and are cable friendly and finger safe.

(1): for offer with earth terminal block.

(2): for offer with earth and neutral terminal blocks.

Example of 2 enclosures with a width of 24 modules of 3 rows and 2 interfaces of 3 rows, vertically associated.

Pragma

Surface mounting enclosures Interfaces

Offer: with earth terminal block

A range of ready-to-use enclosures devised for electricians: ergonomics and flexibility of installation. The Pragma offer is particularly robust, especially the 24-module enclosures thanks to their metal structure and their reinforced front face.

Function

This distribution enclosure is intended for top of the range residential and tertiary sectors. An interface, dedicated to the end-user, allows installation of modular and specific switchgear: wiring devices, industrial power outlets, emergency stop and other buttons and indicator lights, etc. The 24-module enclosures can accommodate the NSXm 160 incoming circuit-breaker or switch, equipped if necessary with an earth leakage protection module.

Pragma

Surface mounting enclosures

Offer: Universal

Pragma is the first modular enclosure combining ergonomics, attractive design and robustness at top level. This new enclosure, available in surface- and flush-mounted versions, has class II total insulation.

The surface mounting enclosures

The range consists of enclosures with a width of 13 or 18 modules of 3 rows.

Function

This surface enclosure is intended for the top of the range residential and tertiary sectors. The universal version is the best solution for all the non electrical distribution application like multimedia central or alarm; thanks to DIN Rail and the universal grid, all components are compatible.

Smart accessories let you move around the components the way you like, creating a structure in perfect order and tailor-made for your customer's needs.

The consistency in design with distribution enclosure range allow best installation in term of aesthetic and technology.

Pragma Universal can be associated to electrical distribution enclosure and guarantee a good final design.

Pragma

Flush mounting enclosures

Pragma is the first modular enclosure combining ergonomics, attractive design and robustness at top level. This new enclosure, available in surface- and flush-mounted versions, has class II total insulation.

The flush mounting enclosure

The range consists of enclosures with a width of 13, 18 or 24 modules of 1 to 6 rows. The entire range can be associated horizontally or vertically.

Easy installation and large cabling space

The chassis shapes are rounded and are cable friendly and finger safe.

PB101409_SE-55

Enclosures

PB117760-13

Gypsum board mounting kit

Wall-mounted adjustable chassis

The chassis can be adjusted horizontally and in depth. The front face of the enclosure is always horizontal, whatever the position of the rear part flush-mounted in the wall.

Split neutral terminal block⁽²⁾

Allows installation of a neutral terminal block between 2 rows near an RCD.

Multi-position DIN rail

2 heights and 2 depths.

Side pre-cutouts

Allow entry of cables or tubes.

Insulating screen

NSXm switch or circuit-breaker

Installed in 24-module enclosures thanks to a dedicated mounting plate. Can be equipped with a Vigi module and associated with the Polybloc 160.

Cable or tube entry

Mounting lugs

Allow flush mounting without cement.

Split neutral terminal block⁽¹⁾

Allows installation of a neutral terminal block between 2 rows near an RCD.

Modular earth terminal block with quick connection:

- on chassis
- transformable into an incoming splitter block up to 125 A
- on DIN rail.

Association kit

Allows entry of cables after flush mounting of two associated enclosures.

Hinges

Simple and robust, they are mounted easily on the front face of the enclosure by rotation.

Asymmetrical front plate

Used to adapt to the multi-position DIN rail and offers a large marking area.

Removable cable entry plates

Pre cut out for entry of cables or tubes.

(1): for offer with earth terminal block.

(2): for offer with earth and neutral terminal blocks.

Example of 2 enclosures with a width of 24 modules of 3 rows, vertically associated.

Earth terminal blocks (*): see cat. no. table
Identification label

Technical data of terminal blocks

■ Rated insulation voltage Ui: 800 V, Uimp: 4/8 kV.

■ Complies with IEC 60947-7-1 and IEC 60998.

The terminal blocks can also be mounted in Prisma Plus switchboards.

The connections of the terminal blocks (either spring or screw connections), specially developed by Schneider Electric, allow connection of flexible or rigid wires without ferrule (connection of wires with ferrule is also possible).

Presentation

Pragma

Flush mounting enclosures

Offer: Universal

Pragma is the first modular enclosure combining ergonomics, attractive design and robustness at top level.

The flush mounting enclosure

The range consists of enclosures with a width of 13 or 18 modules of 3 rows.

Function

This enclosure is made for flush-mounted in masonry or in gypsum partition. It is intended for the top of the range residential and tertiary sectors.

The universal version is the best solution for all the non electrical distribution application like multimedia central or alarm; thanks to DIN Rail and the universal grid, all components are compatible.

Smart accessories let you move around the components the way you like, creating a structure in perfect order and tailor-made for your customer's needs.

The consistency in design with distribution enclosure range allow best installation in term of aesthetic and technology.

Pragma Universal can be associated to electrical distribution enclosure and guarantee a good final design.

Description

18-module enclosures

13-module enclosures

Cable or tube entry

Mounting lugs
Allow flush mounting without cement.

Wall-mounted adjustable chassis

The chassis can be adjusted horizontally and in depth. The front face of the enclosure is always horizontal, whatever the position of the rear part flush-mounted in the wall.

An universal grid can be mounted in 2 different positions

Side pre-cutouts

Allow entry of cables or tubes.

A plain door delivered with enclosure

PRAS18FU_Image_fond blanc

Technical data

Enclosures and interfaces

In conformity with standard	IEC 60670-1	
Enclosure color	White RAL 9016	
Degree of protection	IP	IP40: with door
	IK	IK09: with door
Materials	Enclosure	Metal and plastic
	Self-extinguishing Technoplastic ⁽¹⁾ material Resistant to fire and abnormal heat to (as per IEC 60695-2-11): ■ Front/cover: 750°C ■ Back: 750°C	
	Door	13 and 18 modules
Insulation	Plastic	
Rated insulation voltage (Ui)	Class 2	
	< 400 V	

Advantage: thanks to its design, the entire Pragma range has "total insulation": no components on the enclosure, interface or door need be earthed.

(1) Technoplastic material specially developed by Schneider Electric.

Electrical accessories: modular terminal blocks

- Rated insulation voltage U_i : 800 V.
- Impulse withstand voltage U_{imp} : 8 kV.
- Behaviour with the current of short-circuit: the breaking capacity reinforced in filiations of the distributors and Minibloc connector blocks, was checked until 150 kA rms in the cases of associations apparatus upstream - distributor - apparatus downstream for ranges of apparatuses Schneider Electric.
- Complies with IEC standard 60947-7-1 and IEC 60998.

The connections of the terminal blocks (either spring or screw connections), specially developed by Schneider Electric, allow connection of flexible or rigid wires without ferrule (connection of wires with ferrule is also possible).

Waterproof enclosures

Kaedra

Technology combined with attractiveness

Attractiveness

Waterproof enclosures are no longer hidden. The design of the Kaedra enclosures and PK industrial power sockets enables them to fit in perfectly with all environments: service sector, industry, craft industry, etc

Ease and flexibility of installation

Numerous astute mounting features, great cabling comfort, a single type of opening to receive power sockets, buttons, indicator lamps,... installing Kaedra is really child's play. All the enclosures can be combined horizontally (irrespective of their height) and vertically (if they have the same width).

Scalability without constraint

The enclosures can be combined very freely, to optimize the construction of your electrical switchboards and upgrade them without any constraints.

Kaedra and PK, the perfect marriage!

The new design of PK industrial power sockets fits in perfectly with the modern, innovative appearance of Kaedra enclosures.

Kaedra

Waterproof enclosures

Kaedra is thus a comprehensive and consistent solution for the installation of all Schneider Electric switchgear, incorporating safety, functionality, ergonomics and attractive design.

The most comprehensive enclosure range

For the production of electrical switchboards incorporating protection, control and distribution

- Modular protection devices
- Power outlets
- Pushbuttons and indicator lights, etc.
- Non-modular switchgear (transformer, motor control, etc.).

For tertiary, small contracting and industrial sectors

- For environments requiring optimum protection of persons and electrical switchgear.

Ergonomics

- Kaedra switchboards offer remarkable cabling space.
- Both the cable inlet and internal distribution is simplified.
- The transparent doors enable permanent, immediate checking of operating conditions.
- The interface zones offer quick access to power outlets and control devices.
- The functional openings allow rapid installation of all devices directly or using matching plates.
- The frame and all its possibilities guarantee assembly time savings.

Attractive design

Their modern, rounded shape, result of in-depth design and ergonomic studies, make the Kaedra switchboards ideal for use even in places visible to the general public. Their innovating colours ensure enhanced integration, while at the same time guaranteeing the basic requirements of visibility and inspection of switchgear.

632100

Available in 7 versions from 3 to 72 modules

They allow installation of modular switchgear up to 125 A, as well as non-modular switchgear on slotted mounting plate.

Enclosures for modular switchgear with interface

Available in 3 versions of 12, 24 and 36 modules.

The interface zone offers the possibility, thanks to the functional plates, of installing on the switchboard front face, control or protection devices, indicator lights and PK series power outlets of the domestic or industrial type. They thus ensure completely safe use.

Interface enclosures

Available in 2 versions with 2 or 3 openings. They can be used by themselves, horizontally or vertically, or associated with other enclosures as cable trunking or interface zone (control devices, indicator lights, etc.).

Versatile enclosures

Available in 5 sizes. They are designed for production of control and monitoring switchboards with non-modular type devices.

Enclosures for power outlets

■ 90 x 100 mm openings

Available in versions with 1 to 8 openings. They are characterised for the new functional feature with openings allowing installation of all PK power socket outlets or the incorporation of control and indicator light functions.

■ 103 x 225 mm openings

Available in versions with 1 to 4 openings. They can accommodate the new PK Unika interlockable power outlets

■ Versatile (smooth surface to be drilled)

Available in 5 sizes. They allow mounting of flush-mountable power socket outlets up to 125 A.

Kaedra

Modular mini enclosures and enclosures

Offer: T 650°C - without terminal block

3 to 12 module mini enclosures.

Add-on 12 to 72 module enclosures.

Kaedra enclosures and mini enclosures for modular switchgear.

Description

Enclosure

- Reversible front face for opening of door to the left or right
- Inside depth available for installation of non-modular switchgear between the slotted mounting plate and the plain front plate: 100 mm
- Reversible front plate according to distance between axes of rails (125, 150, 175 mm).

Mini enclosure

- Clip-on terminal block support
- Back with dovetail to accommodate 4-hole terminal block and wiring strap.

Technical data

Kaedra switchboards guarantee a high degree of protection and increased dependability.

Enclosures

In conformity with standards	Empty enclosures	IEC 60670-1 and 24
	Equipped switchboards	IEC 61439-1 and 3

■ mini enclosures: class II plugs

■ enclosures: class II plugs and blanking plates (5 modules of 18 mm per row).

Kaedra

Modular mini enclosures and enclosures

Offer: T 750°C - 1 or 2 terminal blocks

3 to 12 module mini enclosures.
Add-on 12 to 72 module enclosures.

Kaedra enclosures and mini enclosures for modular switchgear.

Description

Enclosure

- Reversible front face for opening of door to the left or right
- Inside depth available for installation of non-modular switchgear between the slotted mounting plate and the plain front plate: 100 mm
- Reversible front plate according to distance between axes of rails (125, 150, 175 mm).

Mini enclosure

- Clip-on terminal block support
- Back with dovetail to accommodate 4-hole terminal block and wiring strap.

Technical data

Kaedra switchboards guarantee a high degree of protection and increased dependability.

Enclosures		
In conformity with standards	Empty enclosures	IEC 60670-1 and 24
	Equipped switchboards	IEC 61439-1 and 3
Colour	Light grey RAL 7035 and transparent green wicket gate	
Degree of protection	IP	IP65 (as per IEC 60529)
	IK	IK09 (as per IEC 62262)
Insulating	Class 2	
Additional characteristics		
Operating temperature	-25°C to +60°C	
Flame and abnormal heat resistance	750°C conform to regulations for establishments open to the general public and very high buildings	
Resistance to chemicals and atmospherics agents, UVs		
Optional locking of the door, sealing of the front face and front plates

Waterproof enclosures

Description

For enclosure implementation		Cat. no.
Type	Description	
 Association kit E88345	Used for horizontal or vertical association of two enclosures with one another while preserving IP65	13934
 Wall mounting lugs E88346	Used to fix the enclosure to the wall without using holes in the back of the enclosure	13935
 Row separator E88347	Used to create IP2 insulated zones. For example: separate strong and weak current zones	13936
 Jack-up block E88348	Used to detach the enclosure from the wall in order to route cables behind the enclosure (2 lengths of 1 metre to be cut)	13938
 Plain front plate E88355	Used to hide a zone without modular switchgear	
	12 modules	13944
	18 modules	13945
 Blanking plate E88350	Clipped onto the front plates to conceal slots with no devices	13940
Junction for trunking	Allows tidy incoming of cables in a trunking	
	Enclosure 340 mm wide	13939
	Enclosure 448 mm wide	13929

For switchgear implementation		Cat. no.
Type	Description	
 Functional plates for 90x100 mm slot E88351	Adaptation (screwed-on) for 65 x 85 mm power outlets	13136
 E88352	Blanking or adaptation (screwed on) for 65 x 65 mm or 75 x 75 mm power outlets (slot to be punched out)	13137
 E85165	Blanking or adaptation (clipped on) for buttons, indicator lights and switches of diameters 16 and 22 mm (1 central slot or 2 side by side to punch out).	13138
 E88843	Blanking for identification (clipped on)	13141
 Functional plates for 103 x 225 mm slot E88354	Adaptation (screwed on) with 2 openings: 65 x 85 mm and 90 x 100 mm	13142
 E88820	Blanking or adaptation (screwed on) offering 1 slot for 65 x 65 mm or 75 x 75 mm power outlets (to be punched out) and a versatile zone	13143
 E88819	Adaptation (screwed in) for 63 A 100 x 107 mm LV power outlet	13144
 Interface kit for 90 x 100 mm slot for E88353 E88844	INS40 to 80 A (chassis + plate)	e.g. residual current circuit breaker (chassis + plate + membrane)
	Modular switchgear up to 4 modules	
 Slotted plate (150 x 250 mm) E88356	Screwed onto the back of the enclosure, used to fix non-modular devices	13941

Description (cont.)

For electrical connection		Cat. no.
Type	Description	Inclined version
Terminal block support  E88357  E88358	Flat iron (12 x 2 mm), 2 versions: screwed onto the pins or onto the chassis Terminal block support for mini enclosure 4 modules 6 modules 8 modules 12 modules	 13361 13362 13363 13364
	Terminal block support for enclosure On chassis 8 modules 12 modules 18 modules	 - 13925 13599 13597 13595 13598
	Set of insulated terminal blocks with IP42 covers  E95147	4 holes: clipped onto the terminal block supports, fixed onto walls by dovetails 5 x 4 holes (2 blue, 3 black) 2 black covers 2 green covers 13445
	 E95148  E95149  E95150	8 holes: clipped onto the terminal block supports, clipped onto DIN symmetrical rail, screwed onto the back 1 x 8 holes (blue) 1 green cover 1 support for 8 back mounting 13446 1 x 8 holes (blue) 1 green cover 1 support for 12 back mounting 13448
	32 holes: clipped onto the terminal block supports 1 x 32 holes (blue) 1 green cover 1 support for 18 back mounting	 13450
	Wiring strap  E88363	Used to guide cables along walls for simplified cabling (set of 5) 13946
Cable support sleeves  E88361	Used for incoming flexible cables	14190
Cable glands  E88362	Used for cable and tube incoming, guaranteeing tightness and mechanical withstand PG11 PG13.5 PG16 PG21 PG29 PG36	 83992 83993 83994 83995 83996 83997
For identification		Cat. no.
Type	Description	
Self-adhesive symbols  E88364	Allows identification of feeders by symbols Currents: loads (power outlet, lighting, convector, etc.), places (bedroom, bathroom, etc.)	13735
	Special: loads (surge arrester, gate, swimming pool, etc.), places (technical room, computer room, etc.)	13736
Self-adhesive sheets for SISmarker printing  E88365	Allows printing of customised labels using the SISmarker software	13260

Kaedra

Waterproof enclosures

For enclosure protection		Cat. no.
Type	Description	
Sealing kit 	Used to seal the front face on the back (2 screws) and the front plates on the front face (4 kits)	13947
Keylock 	Eurolocks combination no. 850. Installed in the door.	13948
Insert 	Installed in the door (male square or triangle, female key supplied)	
	Triangle	13949
	Square	13950

For enclosure maintenance		Cat. no.
Type	Description	
Front plate		10200
		10209
Chassis 1 row	Can be combined to obtain a multi row chassis	10210
		10220

Kaedra

Waterproof enclosures

Pre-cutouts

The new European standard EN 50262 generalises metric dimensions for cable glands.

To simplify the transition, the entire Kaedra range is equipped with pre-cutouts both in ISO/metric standardisation and in PG standardisation. Each pre-cutout is marked:

- simple pre-cutout adapted to the metric cable gland:

- double pre-cutout:

- external: pre-cutout adapted to the metric cable gland/ISO

- internal: pre-cutout adapted to the PG cable gland.

Cable glands

Type of pre-cutout	For cables of diameter (mm)
M16	4 - 8
M20	6 - 12
M25	12 - 18
M32	18 - 25
M50	30 - 38
PG11	5 - 10
PG16	10 - 14
PG21	14 - 17
PG29	19 - 26
PG36	22 - 32

Associations

The enclosures can be associated:

- horizontally, regardless of their height (see diagram below)

- vertically, if their width is identical.

Use the association kit, cat. no. 13934 (2 sleeves + 4 nuts + 4 seals) in the M32 pre-cutouts marked with a double arrow.

Insertion of cables between the enclosures is possible, while preserving the degree of protection IP65.
